

Cybersecurity Solutions for Healthcare

Conceal protects the routing and disbursed storage of electronic records and transactions that have become increasingly hard to manage to deter cyber threats.

The Challenge

In the healthcare industry, cyber attacks continue to increase dramatically in terms of volume and sophistication.

While many struggle to prevent ransomware attacks and outside threats that gain access to private data and internet communications, healthcare organizations are particularly susceptible and often the focus of criminal elements that compromise cybersecurity.

The Solution

Conceal addresses the security needs of healthcare organizations by offering additional security, privacy, performance and significant cost reductions.

Entities that utilize Conceal solutions remain unidentifiable to criminal elements, because we prevent websites from filtering or denying content, enable discreet online surveillance and provide a reduced cyber attack vector.

Conceal's unique network design lowers your cyberattack profile by isolating, obfuscating and dynamically shifting your communications pathways. With Conceal, your network communications are not attributed back to your organization.

Conceal disguises and protects your networks, communications, applications, and data with unique obfuscation solutions.

Disguise and protect your enterprise's online presence. [Visit conceal.io](https://conceal.io)

Conceal for Healthcare

Conceal is an **internet and cybersecurity firm that protects healthcare providers' identities and systems by intelligently selecting and obscuring global network pathways into the core of the internet.**

Our solution provides next generation WAN transport by leveraging existing, cost-effective, internet broadband connectivity to communication between the enterprise, the internet, and the cloud while delivering increased performance, security, privacy, and resiliency within the network.

Healthcare Use Cases

Secure Communications & Protect Data Transport

Communicate confidently and discreetly with your personnel, vendors, third parties and patients. Protect Personally Identifiable Information (PII) and sensitive patient information.

Search & Malware Protected Browsing

Securely conduct discreet research, due diligence and online investigations. Protect your users from malware, spear phishing and browser-based cyber threats with intelligence-grade, zero trust remote browser isolation.

Secure Access to Enterprise Apps, Data & Services

Provide a secure and non-traceable on-ramp to your enterprise cloud and on-premise applications, data and services for your patients, personnel, third parties, and vendors.

Protected Data & Content Storage in the Cloud & On-Premise

Secure sensitive data and host applications in dedicated, zero attack surface and zero trust environments. Provides controlled access and nontraceable connectivity to protected environments within and across multiple public and private clouds.

Data Governance & Compliance

Make intelligent routing decisions and take back control of your data to achieve HIPAA, GDPR & CCPA compliance.

Multiple ways to connect to Conceal
