

ELEVATING CYBERSECURITY WITH CONCEALBROWSE

mSOC.io, a renowned leader in Security Operations Center (SOC) solutions, has partnered with Conceal to integrate their advanced browser extension, ConcealBrowse, into mSOC's comprehensive SOC services.

SHARED GOALS

Frank Angiolelli, CEO of mSOC.io, emphasizes the need for solutions that are simple, manageable, and integrate seamlessly with existing security infrastructures. CONCEAL's focus on social engineering protection in web browsers aligns perfectly with mSOC.io's mission. Gordon Lawson, CEO of Conceal, echoes this sentiment, highlighting the joint commitment to neutralize threats before they cause harm.

EMPIRICAL EVIDENCE

In a comprehensive study, mSOC.io tested ConcealBrowse against human-verified malicious phishing sites designed to mimic legitimate logins. The results were staggering, with ConcealBrowse demonstrating nearly perfect prevention capabilities and being approximately twice as effective as its leading competitor.

BENEFITS

1. Advanced Real-Time Threat Detection

ConcealBrowse leverages state-of-the-art AI technology to identify and neutralize cyber threats in real-time.

2. Comprehensive Protection Against Ransomware and Credential Theft

By transforming standard browsers into secure environments, ConcealBrowse ensures that sensitive information remains protected, reducing the risk of costly data breaches and maintaining the integrity of organizational assets.

3. Seamless Integration and Ease of Management

ConcealBrowse seamlessly integrates into existing security infrastructures without causing disruptions.

AT A GLANCE

mSOC collected a list of dozens of human-verified malicious phishing websites designed to trick users into entering their credentials, designed to spoof legitimate logins with the purpose of compromising companies.

mSOC created a laboratory with three competing technologies and checked if they detected that this website was malicious. The results showed:

- Conceal blocking/mitigating **91%**, outperforming competitors.
- **Nearly perfect** in prevention and **twice** as effective as leading competitors

FRANK ANGIOLELLI

CEO mSOC.io

"MSPs and MSSPs need solutions that are easily deployed, simple to manage, and seamlessly integrate with other security tools. CONCEAL's innovative solutions, focusing on social engineering protection in web browsers, align perfectly with our mission to help organizations stay secure and productive. We proudly include CONCEAL as a key part of our SOC solution offerings."
