

ConcealBrowse for Service Providers

ConcealBrowse Helps MSPs and MSSPs Expand Services and Increase Revenue

Expand Your Cybersecurity Services with ConcealBrowse

As a **Managed Service Provider (MSP)** or **Managed Security Service Provider (MSSP)**, your focus is on delivering innovative and effective security solutions to your clients while maximizing revenue and efficiency. ConcealBrowse is an AI-powered browser security solution that helps you expand into the cybersecurity space, providing edge protection and enabling you to offer superior security services.

Why IT & Security Teams Trust Conceal

ConcealBrowse is a vital cybersecurity tool for IT and security teams, specifically designed to counter the significant risks posed by phishing and social engineering attacks targeting employee vulnerabilities. By proactively protecting user data and devices at the web's edge, ConcealBrowse emerges as a crucial, trusted solution in the cybersecurity domain.

KEY FEATURES

- 1 Enhanced Protection Against Phishing & Social Engineering**
Actively blocks phishing links and counters social engineering, surpassing traditional educational measures and outdated detection systems.
- 2 Sophisticated Phishing Detection**
Leverages Conceal's AI engine to outperform blocklist-based systems, adapting quickly to evolving cyber threats.
- 3 AI-Driven, Real-Time Threat Analysis**
Conducts immediate threat analysis, disrupting cyber threats early to reduce risks like data theft and cyber extortion.
- 4 Privacy-Conscious and Efficient**
Lightweight browser extension that respects user privacy, not uploading or retaining sensitive browsing history.

BUSINESS OUTCOMES

-  **New Revenue Streams**
Bundle ConcealBrowse into your security services to generate new revenue and deliver innovative cybersecurity solutions.
-  **Enhanced Client Protection**
By providing edge protection, you assure your clients that they are safeguarded against ransomware and credential theft.
-  **Operational Efficiency**
Reduces the complexity of managing browser security, saving you time and money while allowing you to focus on delivering superior services.
-  **Proactive Threat Mitigation**
Ensures potentially malicious activities are contained before they become significant issues, leading to faster and more effective threat mitigation.
